06/04/11 20:20 CST	18K	Thunderstorm Wind (EG 52 kt)
06/04/11 20:25 CST	0	Source: Emergency Manager

Trees and power lines were blown down at the corner of 300N and 1270E.

---

### VERMILION COUNTY --- 3.0 S GEORGETOWN [39.94, -87.63]

06/04/11 20:20 CST	2K	Thunderstorm Wind (EG 52 kt)
06/04/11 20:25 CST	0	Source: Emergency Manager

A large tree was blown down across Route 1 south of Georgetown.

---

### VERMILION COUNTY --- RIDGE FARM [39.90, -87.65]

06/04/11 20:25 CST	0	Hail (0.75 in)
06/04/11 20:26 CST	0	Source: Emergency Manager

A weak cold front triggered scattered strong to severe thunderstorms across central Illinois during the late afternoon and evening of June 4th. In addition, a lake breeze front from Lake Michigan dropped into the area, intensifying storms along and northeast of a Champaign to Paris line. Some of the storms produced 50 to 60 mph winds, as well as hail up to the size of golfballs. The most significant damage occurred in Menard County around Sweetwater, when a downburst produced wind gusts of 75 to 85 mph.

---

### CLAY COUNTY --- CLAY CITY [38.68, -88.35]

06/05/11 07:55 CST	0	Hail (0.75 in)
06/05/11 07:56 CST	0	Source: Fire Department/Rescue

---

### WOODFORD COUNTY --- 1.0 S SECOR [40.72, -89.13]

06/05/11 08:30 CST	1K	Lightning
06/05/11 08:31 CST	0	Source: Emergency Manager

Lightning struck a house, knocking a hole in the roof and taking out electrical service.

A cluster of thunderstorms developed across southern Iowa and northern Missouri, then tracked eastward along a stationary frontal boundary into central Illinois during the morning of June 5th. A few of the storms produced hail up to the size of pennies and locally heavy rainfall. In addition, a lightning strike produced minor damage to a home near Secor in Woodford County.

---

### (IL-Z038) MCLEAN, (IL-Z072) RICHLAND

06/06/11 11:00 CST	2	0	Heat
06/08/11 23:00 CST		0	

Direct Fatalities: F59PH, M1PH

A period of hot and humid conditions developed across central Illinois from June 6th through June 8th. Afternoon high temperatures each day reached the lower to middle 90s, while heat index values climbed to around 100 degrees. The hot conditions resulted in the deaths of a 59 year-old woman in Bloomington on June 7th, and a 19 month child in Noble on June 8th.

---

### EFFINGHAM COUNTY --- MASON [38.95, -88.62]

06/10/11 12:35 CST	0	Hail (0.75 in)
06/10/11 12:36 CST	0	Source: Emergency Manager

---

### LAWRENCE COUNTY --- 2.3 ENE BIRDS [38.84, -87.63]

## Storm Data and Unusual Weather Phenomena - June 2011

A large tree was blown onto a garage in Indianola.				
<b>FULTON COUNTY --- FIATT [40.57, -90.18]</b>				
	06/10/11 22:00 CST		0	Hail (0.75 in)
	06/10/11 22:01 CST		0	Source: Emergency Manager
An area of low pressure tracking from northern Missouri into the southern Great Lakes triggered scattered thunderstorms across central Illinois during the afternoon and evening of June 10th into the early morning hours of the 11th. A few of the storms produced large hail up to the size of golf balls, as well as gusty winds of 50 to 60 mph. In addition, a brief tornado touch down occurred in rural Schuyler County near Littleton.				
<b>CRAWFORD COUNTY --- ROBINSON [39.00, -87.73]</b>				
	06/12/11 23:30 CST		0.10M	Lightning
	06/12/11 23:30 CST		0	Source: Newspaper
Lightning strikes from an isolated thunderstorm produced damage to electrical equipment and computers at the Crawford County 9-1-1 center, and at several nearby businesses and a church.				
A weak upper level disturbance in a fast west-northwest flow resulted in showers and isolated thunderstorms across parts of central and southeast Illinois late in the evening of June 12th into the early morning of June 13th. Around 1130 PM LST, one thunderstorm produced a lightning strike which damaged several facilities in Robinson, including the Crawford County 9-1-1 center.				
<b>SCOTT COUNTY --- WINCHESTER [39.63, -90.47]</b>				
	06/13/11 15:25 CST		1K	Thunderstorm Wind (EG 52 kt)
	06/13/11 15:26 CST		0	Source: Law Enforcement
A large tree limb was blown down onto Commercial Street in Winchester.				
<b>CLAY COUNTY --- 2.0 W FLORA [38.67, -88.52]</b>				
	06/13/11 19:55 CST		10K	Thunderstorm Wind (EG 52 kt)
	06/13/11 20:00 CST	3	0	Source: Emergency Manager
A large tree limb was blown down onto a car along Route 50 west of Flora. 3 people inside the car were injured.				
An approaching warm front triggered clusters of thunderstorms from west-central Illinois southeastward into the Ohio River Valley during the afternoon and evening of June 13th. A few of these storms produced damaging wind gusts along and southwest of a Winchester to Flora line.				
<b>SCOTT COUNTY --- 3.1 N NAPLES [39.79, -90.60], 3.7 NE BLUFFS [39.79, -90.48], 2.1 SSE ALSEY [39.52, -90.42], 5.0 WSW GLASGOW [39.53, -90.57], 4.1 SW NAPLES [39.70, -90.65]</b>				
	06/14/11 05:00 CST		0	Flash Flood (due to Heavy Rain)
	06/14/11 12:00 CST		0	Source: Law Enforcement
Rainfall amounts of 3.50" to 5.00", most of which fell between 0500 and 0700 LST, resulted in significant flash flooding across western Scott County. Sandy Creek was out of it's banks, and numerous rural roads were impassable.				
An early morning complex of thunderstorms developed north of a warm front in southeast Iowa and northeast Missouri. These thunderstorms moved into a small part of west central Illinois, resulting in heavy rain and flash flooding in Scott County during the morning hours.				
<b>KNOX COUNTY --- 1.4 N ABINGDON [40.82, -90.40]</b>				
	06/14/11 23:40 CST		0	Hail (0.88 in)

Flash flooding of historic proportions occurred in much of Morgan County from late in the evening of June 17th through much of June 18th. Rainfall amounts of 5.00" to 10.00" were reported, with the highest totals in east central Morgan County from Alexander to Franklin.

The nearly stationary thunderstorms produced a majority of the rain between 2200 LST and 0300 LST. The cities of Jacksonville and South Jacksonville recorded nearly 6.00" of rain in less than six hours, which was about 1.00" higher than a 100 year flood for that time period.

Nearly 2,500 homes, more than 100 businesses - including the Nestle Chocolate plant and many restaurants, MacMurray College, and a state prison with more than 1,600 inmates sustained major flash flood damage. A levee for Mauvaise Terre Lake was overtopped at the Jacksonville Water Treatment Plant, destroying much of the equipment at the facility and shutting off the drinking water supply in Jacksonville for about three weeks until the equipment could be replaced and tested.

Several miles of Interstate 72 east and south of Jacksonville were closed due to high water during the morning of June 18th. Most streets in eastern and southern parts of Jacksonville were covered with several feet of water, and every rural road and highway in the eastern half of the county was water covered and closed.

Numerous people had to be rescued from their vehicles and at the Rolling Acres Mobile Estates mobile home park, however there were no reports of injuries or fatalities. Several pets, however, drowned due to the flooding at the mobile home park.

Property and business damages were estimated to be about \$150 Million. There was no estimate available for crop damages in eastern Morgan County. The flash flooding continued as an areal flood for the same areas for at least another 40 hours, but the impacts of the flooding were felt for more than three weeks.

<b>SANGAMON COUNTY --- 5.3 WNW BERLIN [39.79, -89.99], 2.8 NE BERLIN [39.78, -89.87], 3.0 SSW DIVERNON [39.53, -89.69], 4.5 WSW LOWDER [39.53, -89.93]</b>

## Storm Data and Unusual Weather Phenomena - June 2011

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
Flash flooding of historic proportions occurred in western Sangamon County from late in the evening of June 17th through much of June 18th. Rainfall amounts of 5.00" to 9.00" were reported, with the highest totals along the border with Morgan County. The nearly stationary thunderstorms produced a majority of the rain between 2200 LST and 0300 LST.				
Every rural road and state highway in western Sangamon County was water covered and closed. Streets and about 300 homes in the towns of New Berlin and Loami, as well as numerous farms in west central parts of the county, were severely flooded. Around 22,000 acres of farmland also sustained significant flooding.				
Property and business damages were estimated to be about \$3 Million, while crop losses could be close to \$10 Million. The flash flooding continued as an areal flood for the same areas for at least another 20 hours.

Thunderstorms initiated along an old outflow boundary extending from Jacksonville to near Lawrenceville during the evening of June 17th. Due to a strong low-level jet flowing into the area, the storms continually re-developed and tracked across the same locations, producing between 5 and 10 inches of rain across parts of Morgan and western Sangamon counties through the morning of June 18th. As a result, widespread flash flooding occurred from the Jacksonville area eastward to the Sangamon County border. Significant flash flooding also occurred in a large part of southeast Illinois where 3 to 9 inches of rain was reported. A few of the storms also produced gusty winds and small hail.

---

### MORGAN COUNTY --- 4.4 NE MEREDOSIA [39.88, -90.51], 1.9 NNW PRENTICE [39.87, -90.07], 3.3 ESE PRENTICE [39.82, -90.00], 5.0 NNE ALEXANDER [39.79, -89.99], 3.7 SSE WAVERLY [39.53, -89.93], 2.3 WSW NORTONVILLE [39.56, -90.17], 2.6 SE LYNNVILLE [39.65, -90.31], 4.1 NW CHAPIN [39.82, -90.45]

06/18/11 21:33 CST	0	Flood (due to Heavy Rain)
06/20/11 16:47 CST	0	Source: Emergency Manager

The impacts of the flash flooding from the late evening of June 17th into the early morning of June 18th continued for nearly two more days. In addition, another 1.00" to 2.00" of rain fell over the flooded area from June 18th into the 19th. Many streets in Jacksonville, and the rural roads and state highways in much of the county were flooded for almost three days. The water finally receded on most roadways by late afternoon on June 20th. The damage at the Jacksonville Water Treatment facility resulted in a boil order due to contaminated water, which lasted for nearly three additional weeks for almost 25,000 people. Many businesses, including the Nestle Chocolate factory and Pactiv Manufacturing, remained closed until June 25th due to water damage and the lack of potable water. See the Flash Flood entry for June 17th-18th for estimated damages due to this historic flooding.

---

### SANGAMON COUNTY --- 5.3 WNW BERLIN [39.79, -89.99], 2.8 NE BERLIN [39.78, -89.87], 2.9 SSW DIVERNON [39.53, -89.68], 4.5 WSW LOWDER [39.53, -89.93]

06/19/11 17:30 CST		0	Source: Emergency Manager

The impacts of the flash flooding from the late evening of June 17th into the early morning of June 18th continued for another 20 hours in western Sangamon County. In addition, another 1.00" to 2.00" of rain fell over the flooded area from June 18th into the 19th.

During the afternoon of June 18th at 1:55 PM LST, a 75 year old man drove around a barricade into a flooded roadway on East Loami Road near the Lick Creek South Fork. He climbed to the top of the vehicle, but it was swept away by the rapid current. His truck was found in a nearby pond, but his body was not recovered until the morning of June 20th.

Many streets in Loami and New Berlin, and the rural roads and state highways in western parts of the county were flooded for almost 48 hours. The water finally receded on most roadways by early evening on June 19th.

See the Flash Flood entry for June 17th-18th for estimated damages due to this historic flooding.

Direct Fatalities: M75VE

## Storm Data and Unusual Weather Phenomena - June 2011

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
Thunderstorms during the late evening hours of June 25th produced 2.00" to 3.00" of rain on extremely saturated ground. This resulted in rapid flash flooding of creeks and roads in southern Crawford County. Numerous streets in Robinson and Oblong were flooded as a result. In addition, Illinois Route 1 south of Robinson and nearly all rural roads were water covered and impassable.				

**MORGAN COUNTY --- 3.8 NNW MEREDOSIA [39.88, -90.59], 4.0 WNW PRENTICE [39.88, -90.11], 2.7 E PRENTICE [39.85, -90.00], 1.0 WNW ROHRER [39.66, -89.97], 2.8 S JACKSONVILLE [39.69, -90.23], 0.6 NW MEREDOSIA [39.83, -90.58]**

06/26/11 01:30 CST	0	Flood (due to Heavy Rain)
06/26/11 16:30 CST	0	Source: Emergency Manager

Heavy rainfall during the late evening hours of the 25th produced flash flooding in northern Morgan County. This area flooded very quickly due to extremely saturated ground and major flash flooding which occurred during the previous week. As a result, the flooding was very slow to recede, and area roads remained inundated throughout much of the day on June 26th.

**SANGAMON COUNTY --- 4.6 WSW PLEASANT PLAINS [39.85, -90.00], 2.6 WSW PROUTY [39.66, -89.97], 1.5 N PAWNEE [39.60, -89.58], 2.1 NNE BEAMINGTON [39.70, -89.59]**

06/26/11 02:30 CST	0	Flood (due to Heavy Rain)
06/26/11 08:30 CST	0	Source: Emergency Manager

Heavy rainfall during the late evening hours of the 25th produced flash flooding in western and southern Sangamon County. This area flooded very quickly due to extremely saturated ground and major flash flooding which occurred during the previous week. As a result, the flooding was very slow to recede, and area roads remained inundated into the mid-morning hours of June 26th.

**Clusters of thunderstorms developed along an advancing warm front during the evening of June 25th. Rainfall amounts ranging from 2 to 5 inches created widespread flash flooding in areas that were extremely saturated and where flash flooding had occurred at times during the previous week across west central and southeast Illinois. In addition, some of the storms produced damaging wind gusts and hail as large as quarters...mainly along and southwest of a Rushville...to Decatur...to Robinson line.**

**SCHUYLER COUNTY --- 5.3 WNW BIRMINGHAM [40.29, -90.92], 4.8 NE LITTLETON [40.28, -90.55], 0.9 NNW FREDERICK [40.08, -90.44], 8.3 SW FREDERICK [39.99, -90.55], 5.9 SSE ERWIN [40.05, -90.68], 1.6 S ERWIN [40.11, -90.70]**

06/27/11 09:00 CST	0	Source: Mesonet

Thunderstorms with heavy rainfall produced 2.00" to 3.00" of rain in southern Piatt County during the pre-dawn hours of June 27th. Several rural roads were flooded and impassable as a result of the rainfall accumulations.

---

### COLES COUNTY --- 4.0 W COOKS MILLS [39.59, -88.47], 6.4 NW COOKS MILLS [39.65, -88.47], 1.7 WNW OAKLAND [39.66, -88.06], 3.2 NNW OAKLAND [39.69, -88.06], 4.3 NE OAKLAND [39.69, -87.97], 4.1 SE ASHMORE [39.49, -87.97], 3.0 S ASHMORE [39.49, -88.02], 4.5 SE HUTTON [39.38, -88.01]

06/27/11 04:15 CST	0	Flash Flood (due to Heavy Rain)
06/27/11 09:00 CST	0	Source: Mesonet

Thunderstorms with heavy rainfall produced 2.00" to 3.00" of rain in northern and eastern Coles County during the pre-dawn hours of June 27th. Many rural roads were flooded and impassable as a result of the rainfall accumulations. Some streets were also flooded in Charleston, and standing water was reported along parts of I-57, U.S. Highway 45, and Illinois Routes 130, 133 and 16.

---

### DOUGLAS COUNTY --- 6.3 NNW GARRETT [39.88, -88.47], 4.7 S ARTHUR [39.65, -88.47], 4.0 ESE HINDBORO [39.66, -88.06], 3.8 E HINDBORO [39.69, -88.06], 7.6 S NEWMAN [39.69, -87.97], 4.2 S NEWMAN [39.74, -87.97], 1.8 WNW FAIRLAND [39.88, -88.13]

06/27/11 04:15 CST	0	Flash Flood (due to Heavy Rain)
06/27/11 09:00 CST	0	Source: COOP Observer

Thunderstorms with heavy rainfall produced 2.00" to 3.00" of rain in much of Douglas County during the pre-dawn hours of June 27th. Several rural roads were flooded and impassable as a result of the rainfall accumulations. Streets were also flooded in Tuscola, Arcola and Villa Grove, and standing water was reported along parts of U.S. Highways 36 and 45.

Storm Data and Unusual Weather Phenomena - June 2011

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

Low pressure tracking along a nearly stationary frontal boundary draped across central Illinois triggered several rounds of thunderstorms during the late evening of June 26th into the early morning of June 27th. Heavy rainfall on top of saturated ground, and in areas which had been inundated with flash flooding numerous times during the previous several days in west central Illinois, produced renewed flash flooding. In addition, many of the storms produced damaging wind gusts of 60 to 70 mph and hail as large as golf balls.
